#### VERSATILE AND MULTI-TALENTED

An appealing lighting design is a must for successful sales in shops, museums or galleries. With the latest generation of DEECOS track spotlights, RZB offers a professional lighting solution, which sets the standard in terms of flexibility, performance and lighting design at the point of sale. RZB achieves this commitment to quality thanks to a modular system. This system allows a customised lighting solution to be configured to suit just about any presentation situation, with the maximum amount of attention being drawn to the product or exhibit.

The wide range of DEECOS accessories opens up plenty of options for additional fine tuning. The user-friendly bayonet connection allows the installation of accessories in seconds, without the need for any tools. Exchanging interchangeable lenses or heat-resistant plastic rings for suppressing glare from the side is child's play. Fitters will be delighted with the installation-friendly plug and play function of this multi-talented luminaire.

Thanks to the latest LED lighting technology, the DEECOS range does not require cooling ribs. The clear, modern and timeless cylinder design transforms the high-quality, die-cast aluminium housing into unobtrusive, yet attractive accessories, which stay discreetly in the background and reliably do their job with a service life of at least 50,000 hours.

Other members of the DEECOS family, which can be equipped with the same extensive range of optics and accessories, also include the built-on and recessed downlights Heledon, as well as the recessed spotlights Golas, Rondos and Magcardo.
